

on Science Visualization
AXIS Summer School

Make others see what you mean.
16–19 June 2026 · Tue–Fri · 4 Days
Le Domaine, Villars-sur-Glâne

SCS
Swiss Chemical
Society

A+IS

academy for
exceptionally
informative
science

ready to upgrade your science visuals?

4 days of focused lectures, workshops & reflections
get trained to make better figures!

Led by chemistry research group leaders
Professor Michel Rickhaus (University of Geneva)
and Professor Michal Juríček (University of Zurich),
AXIS connects visualization with storytelling,
creativity, and sharper scientific thinking.

Building on their extensive experience in
publishing high-impact research, securing
competitive grants, and delivering engaging
presentations, you will leave with clearer figures,
simpler stories, and a new way of seeing
and presenting your own research.
